

Ed at the controls of a 1,500 HP Alco RS-3 diesel locomotive on the Nevada Northern Railway.

THE BALTIMORE & NEW YORK RAILWAY

Ed finally had a model railroad! He began in 2006. This was after building or adding details to over 200 and some odd number of locomotives.

Ed lived in the area of Chambersburg PA late in the 1960s. He lived there quite a number of years.

Over the course of his life, he has lived and worked in Illinois, Pennsylvania and New York. He was satisfied for years just operating on others layouts.

Ed retired and relocated to Oklahoma. He was fortunate enough that he could buy a large property. It was on that property where he finally got plenty of space to build his layout, and had ample space for his other hobbies as well. Ed is a “jack of all trades” and is an outstanding builder / modeler!
